EUROPE

WITHOUT DOUBT: LOVE OF INVENTION WILL NEVER DIE

History

Canyon is a global organisation originally established in Japan in 1963 by the inventor of the trigger sprayer Tetsuya Tada. Since then, the company has constantly worked to develop world class, innovative and environmentally friendly fluid dispensing systems for use in both the consumer and industrial markets.

Canyon Europe Ltd was established as our European manufacturing base in 1987. Since then the company has successfully produced a wide range of dispensing products which have been distributed throughout the European and world markets.

Philosophy

The development of the Trigger Spray which uses no harmful CFCs is making a significant contribution to the protection of the ozone layer, essential to all life on our planet. As we look to the future and consider it our responsibility to protect nature, our aim is to use our limited resources with greater care by striving to produce products of superior quality, greater durability and reduced contribution to waste.

We have since produced many types of dispensing systems, which are gentle to the environment. These ecological products are used in business and households worldwide.

Within the realms of Mother Nature, Canyon's philosophy is to the development and production of products which gently contribute to nature and mankind.

40 YEARS OF CONTINUOUS INNOVATION:

Canyon Europe

Canyon Europe Ltd was established outside Belfast in Northern Ireland to provide a closer and more personal service to Canyon's global customer base. The organisation was founded on the principle of 'helping customers be successful' and this philosophy continues.

Today the European site is a fully integrated production, research, and customer service facility designed to meet client needs. Total in-house control of fully automatic injection moulding and assembly processes ensures you have the flexibility and support to meet the challenges and opportunities of your ever-changing market.

Since its original establishment, the high quality and functionality of Canyon's products has become widely recognised. This commitment to quality has been further underlined by Canyon Europe's accreditation to the latest ISO quality standards which ensure that our service to you is continually developed and enhanced.

A wide range of dispensing solutions and options are available to you from Canyon. We also continue to work on the development of new technologies to meet future market needs.

Where you have a specific requirement that you need to discuss, our research and development team are in place to provide you with the expertise to bring the idea to fruition.

INVESTORS IN PEOPLE

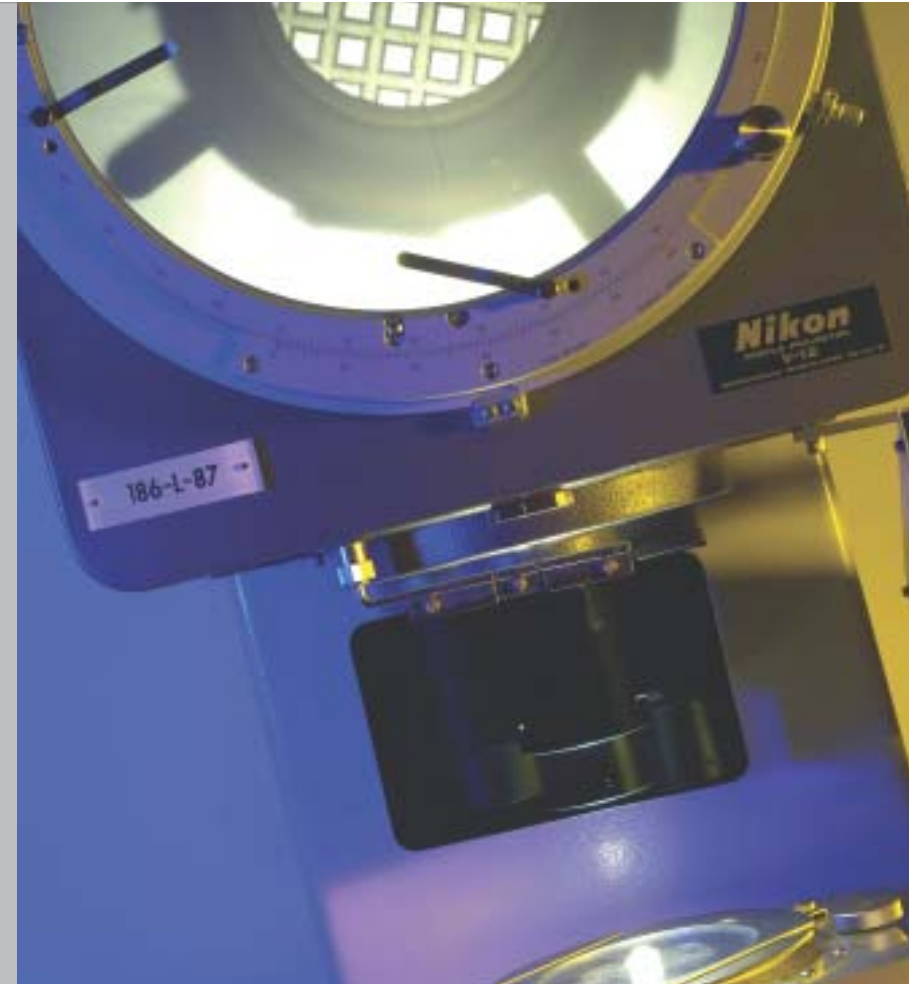

UNIQUE SOLUTIONS: LET'S SEE WHAT WE CAN DO FOR YOU...

Unique Solutions

In the ever-changing market places of modern society, it is essential for businesses to be able to respond rapidly to environmental developments and customer demand. To ensure continued success in your market you need to remain at the forefront of innovation to give your business the edge over competitors.

To meet this need Canyon Europe has in place a state of the art Centre of Excellence to provide tailored solutions to your specific requirements. Facilities available include CAD design, mould simulation software, finite element analysis and the latest polymer and rapid prototyping technology.

This technical expertise combines with over 40 years group experience to provide you with a trusted and accomplished partner for your future growth.

Case Study	
Client Sector	Household Cleaning Products
Project	Design a customised trigger appearance to provide an enhanced brand image in the market place. Develop improved ergonomics for the end user.
Detail	A customised trigger shroud was designed carrying the brand logo moulded on the back. A completely new shape was also produced to deliver the ergonomics required by the customer.

Case Study	
Client Sector	Household Cleaning Products
Project	Develop a mesh foam solution for carpet and upholstery cleaning product.
Detail	Canyon developed a narrow high foam dispensing nozzle with a tailored spray pattern and plastic mesh foamer.

Case Study	
Client Sector	Horticultural Products
Project	Design a customised trigger shroud for easier handling in the garden. Design an adjustable trigger for 180° usage.
Detail	Canyon responded by designing a customised trigger shroud specifically shaped to allow easier usage in gardens. A trigger that rotates to 180° was developed to allow for spraying on the underside of leaves and foliage etc.

Case Study	
Client Sector	Professional Cleaning Products
Project	Client required a trigger which allowed no atmospheric contamination of the liquid product for pharmaceutical/clean room application.
Detail	Canyon responded by developing a specific non vented trigger to work in conjunction with the customer's bottle.

Trigger Sprayers

Trigger sprayers have increasingly been recognised as the most convenient and environmentally friendly delivery format for a wide range of products. Example market sectors include household cleaning, horticultural, automotive, veterinary, and pharmaceutical.

The advanced and flexible functionality of Canyon's sprayers have made them the ideal choice for leading global brands. Features such as accurate dosage, multi-directional functions, tailored nozzle options, and excellent compatibility have provided solutions and added value to many leading products.

The trigger sprayer is today proving increasingly important due to the need to develop environmentally friendly alternatives which protect the planet.

TRIGGER SPRAYERS

Industrial Trigger Sprayers

Canyon's range of Industrial Trigger Sprayers are widely recognised as the most high quality and robust sprayers on the market. They have been specifically designed to handle even the most aggressive products and their long durability has proved essential for many customers. Typical uses include professional cleaning, agricultural use, and veterinary/pharmaceutical applications.

A choice of optional accessories and nozzles have also been developed to meet the wide range of dispensing challenges which arise in everyday use. Available options include flexible extension tubes and extension nozzles.

INDUSTRIAL SPRAYERS

INNOVATIVE SOLUTIONS AROUND THE GLOBE

In addition to the range of products detailed in this brochure, Canyon also offer a selection of dispensing solutions and technologies. Please contact us for further details of how we can meet your needs.
