## Introduction

Within Canyon we are continuously striving to not only increase our product selection for our customers, but also provide a product range which offers innovative design and quality alongside exceptional functional performance to wide demanding markets.

It is with this we are pleased to announce the introduction of our all new lightweight Pre-compression Trigger Sprayer "Minerva" to the market.

### Pre-compression

With Pre-compression, Minerva not only provides an appealing spray performance, but also eliminates drips from the nozzle.

### All Plastic Design

Minerva consists of 10 components made from either Polypropylene or Polyethylene allowing for the sprayer to be fully recycled at end of life.

### Innovative Venting System

The innovative venting system utilised in Minerva, allows for bottles to be transported without risk of leaks.

### High Chemical Resistance

Minerva has been extensively tested and is compatible against a wide range of chemicals.

## Environmentally friendly

Designed with sustainability in mind, the design structure of Minerva alongside its use of only one polyolefin type, provides not only an improved level of durability for reusability, but also provides a highly recyclable sprayer.

## High Quality

Through the manufacturing process like all other Canyon Trigger Sprayers, Minerva is subjected to constant testing and inspection to ensure excellent performance and quality is achieved.

## Lightweight

The design of Minerva has been fully optimised to achieve a lightweight and ergonomic design.

## Markets

With all our products offered, Minerva is no exception in being compatible in a wide range of markets. We are also able to carry out in-house compatibility and function testing on your behalf.

Garden

Household
